Dear Mr. Cwikla,

Thank you for speaking with me by phone on 4/25/2016, at which time I mentioned that we had already responded to the request Water Code Directive Response Requirement for 13267. Due to the number of regions issuing the requests I mistakenly thought I had responded to the original Water Code Directive pursuant to section 13267 received from Los Angeles Regional Water Quality Control Board.

This notice of violation is in reference Los Angeles and Ventura Counties for which Cather Herley Oil Company does not own, operate or Produce any wells in these regions.

Our wells are located in the Central Valley region for which we have completed and submitted all required technical reports. These reports were completed and mailed June 12, 2015 to the attention of Mr. Ronald Holcomb.

David M Herley  
Manager, Cather Herley Oil Company
